CONTENTS OF VOLUME 53

PART 1 (March 1997)

The effect of incomplete knowledge of parameter values on single- and multiple-stage designs for logistic regression. . . . F. M. Spears, B. W. Brown, E. N. Atkinson 1
The behavior of the *P*-value when the alternative hypothesis is true . . . . H. M. J. Hung, R. T. O'Neill, P. Bauer, and K. Köhne 11
Inference for phylogenies under a hybrid parsimony method: evolutionary-symmetric transversion parsimony . . . . J. S. Sinsheimer, J. A. Lake, and R. J. A. Little 23
A test of a special case of typicality in linear descriminant analysis. . . . . A. Bar-Hen and J.-J. Daudin 39
Testing for treatment effect in the presence of regression toward the mean . . . . V. George, W. D. Johnson, A. Shahane, and T. G. Nick 49
Capture–recapture survival models taking account of transients . . . . R. Pradel, J. E. Hines, J.-D. Lebreton, and J. D. Nichols 60
Comparing two diagnostic tests against the same "gold standard" in the same sample . . . . . D. A. Bloch 73
Maximum likelihood estimation for probit-linear mixed models with correlated random effects . . . . J. S. K. Chan and A. Y. C. Kuk 86
Tests to detect clustering of infected individuals within families . . . . T. Britton 98
Regression models for mixed discrete and continous responses with potentially missing values . . . . G. M. Fitzmaurice and N. M. Laird 110
Unequal allocation models for ranked set sampling with skew distributions . . . . A. Kaur, G. P. Patil, and C. Taillie 123
Regression calibration in failure time regression . . . . . C. Y. Wang, L. Hsu, Z. D. Feng, and R. L. Prentice 131
Estimation in forest yield models using composite link functions with random effects . . . . . S. G. Candy 146
Modeling of time trends and interactions in vital rates using restricted regression splines . . . . . C. Heuer 161
Estimating temporary migration using the robust design . . . . . C. J. Schwarz and W. T. Stobo 178
A rank test for distinguishing environmentally and genetically induced disease resistance in plant varieties . . . . K. F. Cardwell and T. E. Wehrly 195
Catch-effort estimation of population parameters under the robust design . . . . . W. R. Gould and K. H. Pollock 207
Estimating lead time and sensitivity in a screening program without estimating the incidence in the screened group. . . . . H. Straatman, P. G. M. Peer, and A. L. M. Verbeek 217
Large hierarchical Bayesian analysis of multivariate survival data . . . . . P. Gustafson 230
Modeling schizophrenic behavior using general mixture components . . . . . D. B. Rubin and Y. N. Wu 243
Transformations to additivity in measurement error models . . . . . R. S. Eckert, R. J. Carroll, and N. Wang 262
On sample reuse methods for spatial data . . . . . P. H. Garcia-Soidan and P. Hall 273
Semiparametric estimation of major gene and family-specific random effects for age of onset . . . . H. Li and E. Thompson 282
Functional data analysis of curve asymmetry with application to the color pattern of *Hydropsyche contubernalis* head capsule. . . . . C. Stéphane, G. Bruno, T. Jean, and C. Annabelle 294
Calculation of catch rate and total catch in roving surveys of anglers . . . . J. M. Hoenig, C. M. Jones, K. H. Pollock, D. S. Robson, and D. L. Wade 306
A discrete survival model with random effects: an application to time to pregnancy . . . . T. H. Scheike and T. K. Jensen 318
A joint model for survival and longitudinal data measured with error . . . . . M. S. Wulfsohn and A. A. Tsiatis 330
Distribution-free tests for one-way homoscedasticity in a two-way classification . . . . . H.-P. Piepho 340

Shorter communications
A logistic model for trend in $2 \times 2 \times K$ tables with applications to meta-analyses . . . . R. J. Cook and S. D. Walter 352
A logistic-bivariate normal model for overdispersed two-state Markov processes . . . . R. J. Cook and E. T. M. Ng 358
A computationally simpler algorithm for the UMVUE of a normal mean following a group sequential trial . . . . S. S. Emerson and J. M. Kittelson 365
The Consultant's Forum
Analysis of correlated ROC areas in diagnostic testing . . . . . H. H. Song 370
Correspondence 383
Book Reviews 385
Corrections 393

PART 2 (June 1997)

Fully parametric and semi-parametric regression models for common events with covariate measurement error in main study/validation study designs . . . . . D. Spiegelman and M. Casella 395
Nonparametric tests for comparing umbrella pattern treatment effects with a control in a randomized block design . . . . D. H. Lim and D. A. Wolfe 410
Estimating medical costs from incomplete follow-up data . . . . . D. Y. Lin, E. J. Feuer, R. Etzioni, and Y. Wax 419
Tree-structured logistic model for over-dispersed binomial data with application to modeling developmental effects . . . . H. Ahn and J. J. Chen 435
Bayesian design and analysis of two × two factorial clinical trials . . . . . R. Simon and L. S. Freedman 456
Predictive variable selection for the multivariate linear model. . . . . J. G. Ibrahim and M.-H. Chen 465
Testing for treatment related trend with partially exchangeable clustered data . . . . . E. O. George and H. Wu 479
Estimation of population trajectories from count data. . . . . W. A. Link and J. R. Sauer 488
Large sample tests for binary outcomes in fixed-dose combination drug studies . . . . S.-J. Wang and H. M. J. Hung 498

Maximum likelihood estimators of the gametic contributions to single-plant progenies . . . . . E. M. Gillet 504
Analysis of aerial survey data on Florida manatee using Markov chain Monte Carlo . . . . . B. A. Craig, M. A. Newton, R. A. Garrott, J. E. Reynolds III, and J. R. Wilcox 524
A stochastic model for the analysis of bivariate longitudinal AIDS data . . . . . J. P. Sy, J. M. G. Taylor, and W. G. Cumberland 542
Signed rank statistics for coherent predictions . . . . . P. R. Rosenbaum 556
Nonparametric analysis of clustered ROC curve data. . . . . N. A. Obuchowski 567
Nonparametric estimation of solid cancer size at metastasis and probability of presenting with metastasis at detection . . . . . J.-L. Xu and P. C. Prorok 579
Predictive model selection for repeated measures random effects models using Bayes factors . . . . . R. E. Weiss, Y. Wang, and J. G. Ibrahim 592
Model selection: An integral part of inference . . . . . S. T. Buckland, K. P. Burnham, and N. H. Augustin 603
Modified tests of independence in 2×2 tables with spatial data . . . . . A. Cerioli 619
Selective genotyping for location and estimation of the effect of a quantitative trait locus . . . . . H. Muranty and B. Goffinet 629
Confidence intervals for the generalized ROC criterion . . . . . B. Reiser and D. Faraggi 644
General formulas for obtaining the MLEs and the asymptotic variance–covariance matrix in mapping quantitative trait loci when using the EM algorithm. . . . . C.-H. Kao and Z.-B. Zeng 653
Joint modeling of live-recapture, tag-resight, and tag-recovery data. . . . . R. J. Barker 666
Effect of omitted confounders on the analysis of correlated binary data. . . . . W.-H. Chao, M. Palta, and T. Young 678
Shorter Communications
Estimation of excess risk from case-control data using Aalen's linear regression model . . . . . Ø. Borgan and B. Langholz 690
A latent process regression model for spatially correlated count data . . . . . L. M. McShane, P. S. Albert, and M. A. Palmatier 698
Consultant's Forum
Assessing interrater agreement from dependent data. . . . . J. M. Williamson and A. K. Manatunga 707
The responsible referee . . . . . D. J. Finney 715
Two-stage method of estimation for general linear growth curve models . . . . . T. A. Stukel and E. Demidenko 720
Regression models for the analysis of pretest/posttest data . . . . . J. M. Singer and D. F. Andrade 729
Weighted logrank tests to detect a transient improvement in survivorship . . . . . S. Wallenstein and A. Berger 736
A random walk rule for phase I clinical trials . . . . . S. D. Durham, N. Flournoy, and W. F. Rosenberger 745
Reader Reaction
Analyzing genotype–environment data by mixed models with multiplicative terms . . . . . H.-P. Piepho 761
Estimation of absolute risk from nested case-control data . . . . . B. Langholz and Ø. Borgan 767
Correspondence
Comment on the use of concordance correlation to assess the agreement between two variables . . . . . G. Atkinson and A. Nevill 775
Rejoinder to the letter to the editor from Atkinson and Nevill . . . . . L. I- K. Lin and V. Chinchilli 777
Book Reviews 779

PART 3 (September 1997)

A dynamic frailty model for multivariate survival data . . . . . H. Yue and K. S. Chan 785
Early stopping to accept H_0 based on conditional power: approximations and comparisons . . . . . R. A. Betensky 794
Sequential analysis of censored survival data from three treatment groups. . . . . R. A. Betensky 807
Receiver operating characteristic studies and measurement errors. . . . . M. Coffin and S. Sukhatme 823
Fieller's theorem, Scheffé simultaneous confidence intervals, and ratios of parameters of linear and nonlinear mixed-effects models. . . . . D. A. Young, G. O. Zerbe, and W. W. Hay, Jr. 838
A likelihood-based approach to the estimation of relative DNA copy number by comparative genomic hybridization . . . . . A. D. Carothers 848
Weighted estimating equations with nonignorably missing response data . . . . . A. B. Troxel, S. R. Lipsitz, and T. A. Brennan 857
Analysis of multichannel patch clamp recordings by hidden Markov models . . . . . S. Klein, J. Timmer, and J. Honerkamp 870
Modification of the Greenwood formula for correlated response times. . . . . S.-S. Kang and K. J. Koehler 885
Generalized covariance-adjusted discriminants: perspective and application . . . . . X. M. Tu, J. Kowalski, J. Randall, ... J. Mendoza-Blanco, M. K. Shear, T. H. Monk, E. Frank, and D. J. Kupfer 900
Linear mixed models with heterogeneous within-cluster variances . . . . . X. Lin, J. Raz, and S. D. Harlow 910
Assessing the effects of interventions using longitudinal data with samples subject to selection . . . . . H.-M. Lin and M. D. Hughes 924
Sample size calculations for studies with correlated observations . . . . . G. Liu and K.-Y. Liang 937
Latent variable modeling of diagnostic accuracy. . . . . I. Yang and M. P. Becker 948
Two-stage adaptive cluster sampling . . . . . M. Salehi M. and G. A. F. Seber 959
Log-linear modeling with the negative multinomial distribution . . . . . L. A. Waller and D. Zelterman 971
Small sample inference for fixed effects from restricted maximum likelihood . . . . . M. G. Kenward and J. H. Roger 983
Evaluation of confounding effects in ROC studies . . . . . C. T. Le 998
A detailed evaluation of adjusment methods for multiplicative measurement error in linear regression with applications in occupational epidemiology. . . . . R. H. Lyles and L. L. Kupper 1008

A bootstrap comparison of genetic covariance matrices . . . . . C. J. Goodnight and J. M. Schwartz 1026
Binary image restoration at subpixel resolution . . . . . D. Hitchcock and C. A. Glasbey 1040
Analyzing bivariate continuous data grouped into categories defined by empirical quantiles of marginal distributions . . . . . C. B. Borkowf, M. H. Gail, R. J. Carroll, and R. D. Gill 1054
Regression estimator in ranked set sampling . . . . . P. L. H. Yu and K. Lam 1070
Use of two-stage test statistic in the two-period crossover trials . . . . . S.-J. Wang and H. M. J. Hung 1081
Shorter Communications
Strip adaptive cluster sampling: probability proportional to size selection of primary units . . . . . J. S. Pontius 1092
Finite mixture models for proportions . . . . . S. P. Brooks, B. J. T. Morgan, M. S. Ridout,and S. E. Pack 1097
A generalized estimating equation approach for modeling random length binary vector data . . . . . P. S. Albert, D. A. Follmann, and H. X. Barnhart 1116
A note on multiple testing procedures in dose finding . . . . . P. Bauer 1125
Methods for comparing the means of two independent log-normal samples . . . . . X.-H. Zhou, S. Gao, and S. L. Hui 1129
Modelling memory in coal tits: an illustration of the EM algorithm. . . . . I. T. Jolliffe and A. R. Jolliffe 1136
Optimum allocation of treatments for Welch's test in equivalence assessment . . . . . H. Dette and A. Munk 1143
Validity and efficiency of approximation methods for tied survival times in Cox regression . . . . . I. Hertz-Picciotto and B. Rockhill 1151
Global measures of local influence for proportional hazards regression models . . . . . W. E. Barlow 1157
Test for linear trend in $2 \times K$ ordered tables with open-ended categories . . . . . S. Gautam 1163
Estimating the generalized impact fraction from case-control data. . . . . K. Drescher and H. Becher 1170
Correction 1177
Book Reviews 1178

PART 4 (December 1997)

Mantel–Haenszel test statistics for correlated binary data . . . . . J. Zhang, D. D. Boos 1185
Link-based models for survival data with interval and continuous time censoring . . . . . N. Younes, J. Lachin 1199
Stratified two-sample tag–recovery census of closed populations . . . . . S. G. Banneheka, R. D. Routledge, C. J. Schwarz 1212
Analysis of overdispersed count data by mixtures of Poisson variables and Poisson processes . . . . . P. Hougaard, M.-L. T. Lee, G. A. Whitmore 1225
Bayesian approach for nonlinear random effects models. . . . . D. K. Dey, M.-H. Chen, H. Chang 1239
From genotypes to genes: doubling the sample size . . . . . P. D. Sasieni 1253
Bayesian design for dose–response curves with penalized risk . . . . . D. Sun, R. K. Tsutakawa 1262
Regression analysis of interval-censored survival data with covariates using log-linear models . . . . . D. K. Kim 1274
Discriminant diagnostics . . . . . P. A. Lachenbruch 1284
Truncated recurrent event survival models for methadone data. . . . . A. Salter, P. J. Solomon 1293
Calibration inference based on multiple runs of an immunoassay . . . . . Q. Zeng, M. Davidian 1304
Exact confidence intervals for a variance ratio (or heritability) in a mixed linear model . . . . . B. D. Burch, H. K. Iyer 1318
Semiparametric regression analysis for recurrent event interval counts . . . . . J. G. Staniswalis, P. F. Thall, J. Salch 1334
Effect of excluding sib matings on inbreeding coefficient and effective size of finite diploid populations . . . . . J. Wang 1354
Nonlinear regression analysis of the joint-regression model . . . . . M. P. Ng, G. K. Grunwald 1366
Genotype by environment variance heterogeneity in a two-stage analysis . . . . . A. Frensham, B. Cullis, A. Verbyla 1373
A method for assessing age–time disease incidence using serial prevalence data. . . . . I. C. Marschner 1384
Accurate confidence limits for quantiles under random censoring . . . . . R. L. Strawderman, M. I. Parzen, M. T. Wells 1399
How order affects the sign test. . . . . J. C. W. Rayner, D. J. Best 1416
Establishing equivalence of two treatments and sample size requirements in matched-pairs design . . . . . J. Nam 1422
A measure of DNA sequence dissimilarity based on Mahalanobis distance between frequencies of words . . . . . T.-J. Wu, J. P. Burke, D. B. Davison 1431
Design aspects of calibration studies in nutrition, with analysis of missing data in linear measurement error models . . . . . R. J. Carroll, L. Freedman, D. Pee 1440
Shorter Communications
Generalized estimating equation model for binary outcomes with missing covariates. . . . . F. Xie, M. C. Paik 1458
An age-adjusted trend test for the tumor incidence rate for multiple-sacrifice experiments . . . . . R. L. Kodell, H. Ahn 1467
Estimation of variance in Cox's regression model with shared gamma frailties . . . . . P. K. Andersen, J. P. Klein, K. M. Knudsen, R. Tabanera y Palacios 1475
Hazard regression with interval-censored data . . . . . C. Kooperberg, D. B. Clarkson 1485
A distribution of tumor size at detection: An application to breast cancer data . . . . . A. D. Tsodikov, B. Asselain, A. Y. Yakovlev 1495
A note on "A concordance correlation coefficient to evaluate reproducibility". . . . . C. A. E. Nickerson 1503
Some results on step-up tests for comparing treatments with a control in unbalanced one-way layouts . . . . . W. Liu 1508

A method for comparing positive rates of two blood culture systems ..... Y. Qu, K. A. Easley 1513
The Consultant's Forum
Robust analysis of within-unit variances in repeated measurement experiments
..... A. R. Padmanabhan, V. M. Chinchilli, G. J. Babu 1520
Random effects probit and logistic regression models for three-level data..... R. D. Gibbons, D. Hedeker 1527
Multiple imputation methods for the missing covariates in generalized estimating equation
..... F. Xie, M. C. Paik 1538
Reader Reaction
Likelihood analyses of overdispersed Poisson models ..... J. B. Douglas 1547
Analysis of clustered polytomous data using generalized estimating equations and working covariance structures ..... R. J. O'Hara Hines 1552
Correspondence
Fisher Memorial Lectures..... A. W. F. Edwards 1557
Book Reviews 1559
Corrections 1566
Acknowledgements 1567
